Features

- Switch ON:** There is a main ON / OFF switch which will turn the Control Panel ON or OFF. In the **ON** mode it turns on the Bluetooth inside the Control Panel, the Control Panel and Sensors. It can be in Automatic mode or Manual mode.
- Automatic Mode:** In Automatic mode the pump switches on and off based on signal from the sensors in the overhead tank and the Sump. It is recommended to keep the system in this mode at all times.
- Manual Mode:** In manual mode the pump starts without any signal from the sensors. There is a possibility of overflow in the overhead tank when there is water in the overhead tank and Sump. The motor can run dry if there is no water in the sump. Please be careful in this mode as Physical monitoring is required to check the water levels in the Overhead Tank and the Sump.
- Mobile App:** The mobile app can be linked in with the Bluetooth / WiFi inside the Control Panel to switch on and off the controller. The controller will switch on and off the pump based on the signal received from the sensors in the overhead tank and the Sump.
- Bypass mode:** If for some reason the sensors malfunction, using the mobile app one can bypass the sensors and switch on and off the pump.
- Switch OFF:** When the switch is **OFF** there is no power supply to the Bluetooth , the Control Panel and the Sensors. In this mode we carry out installation, repairs and maintenance of the system.

Pricing and Scope of Supply of Automatic Water Management System:

S.No	Description Of Goods	HSN/SAC	Qty	Unit Rate (INR)	Amount (INR)
1	Consultancy Fee	998311	1	5000.00	5000.00
